

School & Preschool Based Speech Therapy Services

Provided by Hills District Speech Therapy

About Hills District Speech Therapy

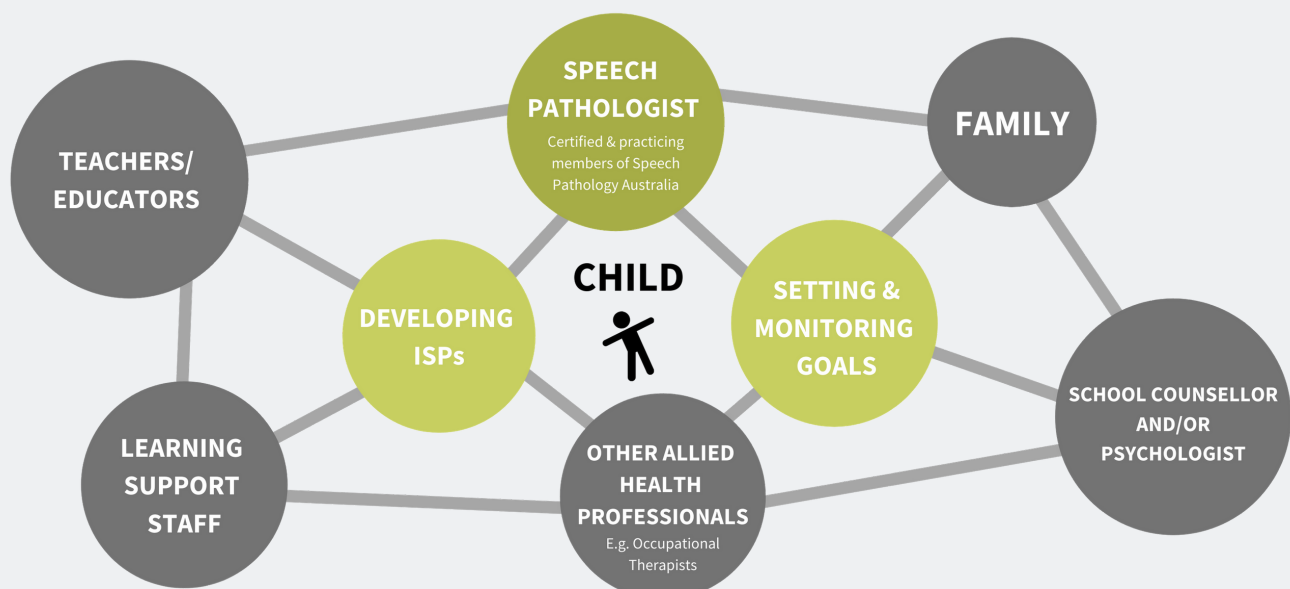

Hills District Speech Therapy (HDST) was founded in 2012 by current Directors, Yasemin Burmin and Alana Adolphi. We are a passionate team of certified speech pathologists and support staff with the collective goal of providing excellence in speech pathology. We offer high quality assessment and therapy services across a range of practice areas for children and adults requiring speech pathology.

About our School and Preschool Based Speech Therapy Services

Hills District Speech Therapy provides assessment and intervention services to a growing number of preschools and schools across the Hills District. This allows us to work closely and collaboratively with the child's school, ensuring success in the classroom environment, whilst providing busy families with a viable alternative to our onsite and online sessions.

We endeavour to build and sustain open lines of frequent communication with the child's teachers, learning support staff, and other allied health professionals in the development and tailoring of ISPs and goals, and monitoring of progress across the school term/s.

What services does HDST provide at schools and preschools?

Our Speech Pathologists provide the following services to our clients at preschools and schools in the greater Hills district:

- ✓ Individual assessments and review assessments (including supply of school/preschool questionnaires to incorporate into client reports)
- ✓ Classroom observations
- ✓ Speech and language screenings (Preschool and Kindergarten)
- ✓ 1:1 therapy sessions (30 mins | 45 mins | 60 mins)
- ✓ Group-based therapy and Peer sessions (1 SLP and 2 students)
- ✓ Participation in learning support meetings and ISP development
- ✓ Preschool/school specific meetings
- ✓ Workshops and education for staff and parents

Is our school/preschool suitable for an external Speech Pathologist?

- ✓ HDST will directly organise services and payment with each family.
- ✓ HDST will work with the educator/s and the client to see what time works well for all parties.
- We have a **quiet, private space** for the therapist to use (this doesn't need to be a separate room). This space is free for the same regular time each week.
- We have permission for external therapists to provide services.
- We can provide HDST with a checklist of the necessary steps to organise sessions on our site.
- We are willing to work collaboratively with HDST and their therapist/s.

What do we need from our partnering schools and preschools?

With written consent, our Speech Pathologists will need the following contact details (email and/or phone) prior to commencing sessions at the school/preschool.

- Contact details for the child's teacher
- Contact details for the child's learning support teachers/team
- Contact details for the School Principal/Head Administrator or Preschool Manager

What is our philosophy and approach to speech pathology?

Our administration team at HDST are experienced at providing schools and preschools with necessary documentation and training certificates for our Speech Pathologists, at their request. This includes working with children's check numbers, police checks, 100 points of identification, CPR training, mandatory child protection training, worker's compensation and public liability.

Handy Contact Details

Phone: (02) 9899 7853*

**If your call is unanswered, please leave a voice message addressed to the child's therapist. They will receive your message and return your call as soon as possible.*

Connect with HDST!

Hills District Speech Therapy is active across a range of social media platforms. This is a quick and easy way for us to communicate with our clients, their families, local schools and preschools, and the wider community about our services, team efforts and upcoming events. We also use our socials to share valuable information about speech pathology and relevant support services available in the Hills District. Our website, is also regularly updated with information on our services, clinic and therapists.
